

219 PLASTIC HOOK SWEEP LOCK

Single Hung **D**ouble hung

These rugged thermo-plastic sash locks are designed to be a strong and cost effective replacement for most zinc die-cast locks.

The locking mechanism has a spring loaded click feel and noise. The hard plastic used for this lock gives the look and feel of metal locks.

Its color is infused in the plastic and will not chip or peel. The spring for the locking mechanism is made of plastic and will not rust or loose its tension.

This lock is available in several configurations to suit all screw hole locations, as well as various CAM styles and CAM lengths.

We will design to any requirement that you may have.

MATERIAL: Lock and keeper are made of UV resistant, thermo plastic to resist weathering, chipping and flaking.

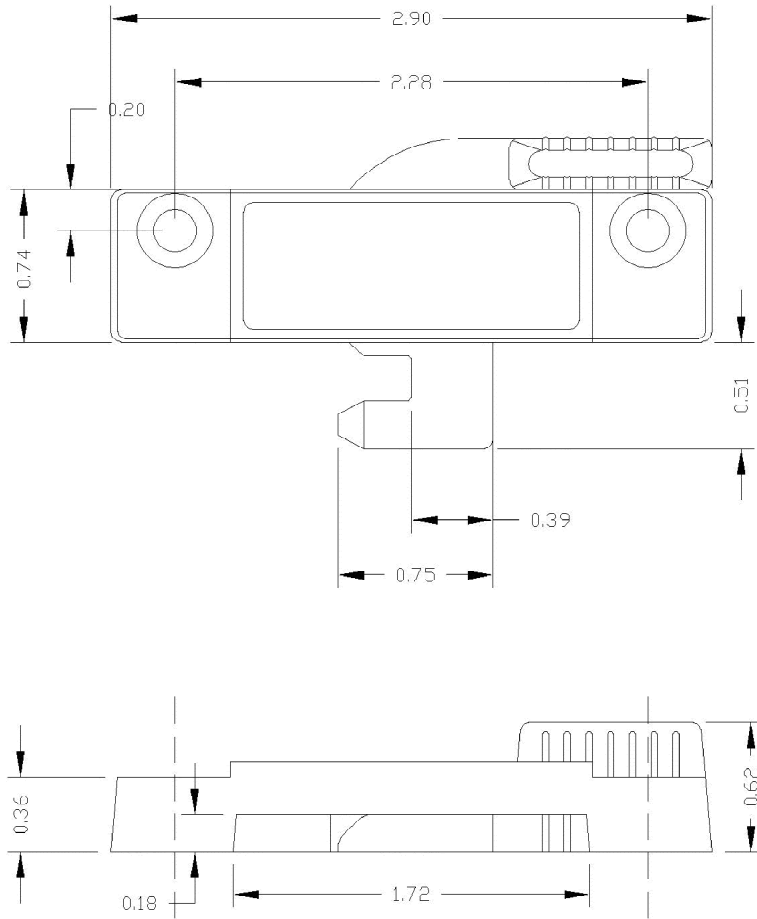

REPLACES: Zinc die cast and plastic sweep locks.

ORDERING INFORMATION:
Choose part Number 219-818-XX
(XX is the color required).

For your special requirements, please call us at our sales office. The address is given at the back of this page.
